VaxALPR Acceso is a system to provide automatic access control based on the license plate. The license plate is read from the video stream generated by one or more cameras.

It offers an automatic, **quick** and **secure** access control based on the vehicle's plate.

The authorization or denial lists can be managed locally or remotely .

The entry and exit **accesses are registered** for later use and analysis (including entry/exit pictures).

- ✓ AUTOMATIC DOOR / BARRIER OPENING
- ✓ ACCESS REGISTRY
- ✓ REGISTRATION OF MANUAL OPENINGS
- ✓ GET RID OF REMOTE CONTROLS OR KEYS
