- AREAS & CAMERAS MANAGEMENT
- TIMETABLE MANAGEMENT
- DAY/NIGHT PERFORMANCE
- 24H OF HIGH QUALITY IMAGE
- LOCAL/REMOTE ADMINISTRATION
- SNAPSHOT HISTORY
- AUTHORIZATION MANAGEMENT FOR EXCEPTIONS
- REPORTS & FINE GENERATION

VaxALPR Viales is an automatic system for license plate analysis used to control vehicle access to certain streets, roads or public spaces.

The system automatically captures all the licenses plates of vehicles passing through a checkpoint. They are then checked against an authorization access database and a fine is generated where appropriate.

The system works 24 hours a day and operates solely on video analysis.

Expensive and problematic retractable electric bollard systems are no longer needed.

- ✓ ACCESS CONTROL TO RESTRICTED AREAS
- ✓ STAYING TIME CONTROL
- ✓ GET RID OF BOLLARDS
